

170 Traymore Blvd. Eastlake, OH 44095 Thank you for choosing the **EVILUSIONS** Super  
Knee Buckler Air Cannon.

### OPERATING INSTRUCTIONS

The Super Knee Buckler Air Cannon is designed to be have it's 6 air outlet plates mounted to the back of one of your attraction's walls, over head, or under a floor, and give a great startling scare. Your new cannon should be set on the ground and not elevated. Elevating the cannon could create a potentially hazardous condition for your customers.

- 1) Place the air outlet plates against the mounting surface of choice, mark attachment hole locations on the wall. Drill thru holes at each mark and attach plates with round head machine screws available at any local hardware store.
- 2) Plates should not be mounted in a position that is potentially hazardous to customers.
- 3) Attach supply line from air compressor with 1/4" industrial style quick connect fittings.
- 4) Pull adjustment knob on air regulator and turn clockwise to increase air pressure in tank, and counter clockwise to lower pressure in tank. The higher the pressure, the harder the impact on your customer's legs and the louder the noise produced. DO NOT EXCEED 100PSI.
- 5) Plug in solenoid valve to a source of 110vac to activate scare. Valve should not be activated for more than 1 second at a time in momentary bursts. Your cannon can be triggered from any source of 110vac.
