

170 Traymore Blvd.
Eastlake, OH 44095

Thank you for choosing the **EVILUSIONS** Wireless outlet control box.

OPERATING INSTRUCTIONS

- 1) Plug male 110vac plug into wall or extension cord. Plug load (light, solenoid valve, etc) up to 3 amps (300 watts).
- 2) Attach 9v battery.
- 3) The small switch is your battery power on and off, toward the flat lever switch is off, away from the flat lever switch is on. When not in use switch off to conserve battery life.
- 4) The flat lever switch selects whether or not there is power applied to your load when the wireless remote's button is not pressed. You can select for the power to be normally off, for example when controlling an air cannons solenoid valve, then when your remotes button is pressed the power will be applied to the valve. When the flat lever switch is the opposite direction, power will normally be on, then when you press the wireless remote's button the power to the load will turn off, for example switching off the light in a scene to allow your actor to get into position.

WARNING! This product is not designed to be used in a wet environment. If used outside, or in a damp environment all precautions should be made to prevent all electrical components from getting wet. Permanent damage to the product, persons, or property can occur.
